

GENERAL REFERENTIAL & ADMINISTRATION (GRA)

GRA is the core application of the System and is provided automatically as a pack (tools and contents). This application is meant for:

✚ **The database administrator** to manage the repository on general, international, national, regional and specific basis as it is common to all applications:

- ☞ Identification: Company-Institution, centers /establishments, locations
- ☞ Geography: Countries, languages, postal codes, governorates and localities
- ☞ Legal & economic form: Supervising authorities, legal forms, branches, divisions and economic sectors.
- ☞ Profession : Jobs, specialties, professional categories, administrative status and educational levels
- ☞ Civil status: Civil status, kinship and IDs
- ☞ Finance: Banks, bank branches, taxes, currencies, rates of exchange, forms of payment, types of payment and conditions of payment.

✚ **The System administrator** to manage two key aspects:

- ☞ Access security: Assign the corresponding and adequate roles as well as IPs to users according to the SSO and LDAP principles
- ☞ Personalization of messages and editions.

Assignment of profiles to menus
